

Palacio de
SADA

Crianza 2013

This cuvee is a blend of grapes of different varieties and displays the great potential of our mountain vineyards and the influence of the area's cool climate.

Wine-making

Temperature-controlled fermentations using indigenous yeasts are carried out in concrete vats followed by long ageing in French and American oak barrels.

Vines

Mountain vineyards of Cabernet Sauvignon, Grenache and Merlot produce wines with cool climate characteristics thanks to the proximity of the Pyrenees. The vines are located around the tiny village of Sada, in the north-east corner of Navarra.

Tasting notes

A medium-deep dark cherry colour with a ruby rim. Complex aromas of ripe plums, black fruit, toast and cocoa. Flavourful on the palate with pleasant tannins and fine oak. A long, very full finish with spices coming through.

BODEGA DE SADA
